DETAILED ACTION

1. This office action is in response to the Amendment, Paper No. 8, filed August 26, 2002.

Accordingly, claims 1-31 are currently pending in this application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1-4 and 7-16 stand rejected under 35 U.S.C. 102(e) as being anticipated by Kawahata (USPN 6,356,318 B1) for the same reasons set forth in the last office action.

Allowable Subject Matter

4. Claims 5, 6, and 17-31 are allowed for the same reasons set forth in the last office action.

Response to Arguments

5. Applicant's arguments filed on 10/25/2002 have been fully considered but they are not persuasive.

Applicant argued that Kawahata does not teach a storage electrode at the interior of the gate insulating film to overlap with the gate line as recited in claims 1 and 7. The Examiner disagrees with the Applicant's remarks because Kawahata discloses a LCD device comprising a storage capacitor Cs having a gate line 7', a gate insulating film 8, an insulating film 10, and a storage electrode 15 formed at the interior of the gate insulating film to overlap with the gate line as clearly shows in Figs. 1 and 2. Thus, the LCD device of Kawahata is similar to the device of the instant invention shown in Fig. 6.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
